NASAL INNOVATION FORUM

Housekeeping and Rules of Engagement

Presented by Mary Devlin Capizzi
IPAC-RS Secretariat and Legal
Counsel

Who We Are

The International Pharmaceutical Aerosol Consortium on Regulation & Science (IPAC-RS) is an international non-profit association that seeks to advance the science, and especially the regulatory science, of inhaled and nasal drugs and biologics (INDBs) by collecting and analyzing data, conducting joint research and development projects, and engaging the wider community.

Representing the INDB industry for more than 25 years, IPAC-RS aims to build consensus and contribute to effective regulations and standards by sharing the results of its research through conferences, technical journals, webinars, and discussions with regulatory bodies.

If you are here today and not a member of IPAC-RS, we encourage you to learn more about the benefits of membership. A robust and engaged membership is vital to IPAC-RS' continued success and provides the necessary resources and support to carry out its important mission. Please reach out to me, Dr. Lana Lyapustina, or any representatives from member companies if you'd like to learn more!
